

International Notification of TB Suspects and Cases

International Notification of TB Suspects and Cases for Whom an International Address is Available **(Referral to Mexico – Use ‘Binational Notification’)**

Purpose:

- To inform the TB control program officer in the patient's new country of the patient's arrival
- To provide pertinent clinical information which will allow the new treating medical personnel to assume patient's care
- To ensure follow up and continuity of care for TB suspect or TB case who relocate or plan to relocate for more than 30 days to another country while on anti-TB treatment

Instructions:

- The District Public Health Nurse (DPHN)/designee completes the [International Tuberculosis Notification Form](#) or <http://intranet.laph.local/ph/PDFs/TBControl/Internationalpatients.pdf>  (fill-able form and may save).
- The DPHN/designee provides the original form to the Tuberculosis Control Program Health Center Assistant Program Specialist, PHN (TBCP H.C. APS, PHN) and places the copy in the miscellaneous section of the patient's chart.
- TBCP H.C. APS, PHN will forward the original form to TBCP headquarter and assigned staff will mail or fax the form to the TB Control Program officer in the patient's new country.
- No Follow-up Form is available and no follow-up is required.
